

Company's Profile

Kyrion Technologies Pvt. Ltd., an **IIT Delhi Alumni Venture**, aims to lay a strong underpinning for the technical development of our country, by developing an active interest among youth in new technologies such as **Ethical Hacking & Information Security**.

Computer and Internet being the backbone of every institution, necessitates the measures to be taken to keep the data and network safe from unauthorized access. For this most companies go in for the help of Ethical Hacking, which makes them aware of the shortcomings in their security systems and help them overcome them as effectively as possible.

With the ever increasing requirements of professionals in the field of Ethical Hacking & Information Security, Kyrion Technologies Pvt. Ltd. is all geared up to lay **the foundation of a new venture, Kyrion Digital Securities**.

A recent study conducted by **NASSCOM**, the expected demand of Ethical Hacking professionals by the year 2012 would be around 1,88,000, as opposed to current availability of only about 22,000 professionals. This in itself is a great motivation for students to take up this **potential career option**. One can hope to be as on the seventh cloud if one gives his/her cent-percent.

Kyrion Digital Securities at Kyrion Technologies Pvt. Ltd. has been founded by **a group of IT Security Experts & Professors of Top Engineering Colleges such as IIS, IIT & NITs**. It has laid a foundation in the field of Ethical Hacking & Information Security. Kyrion Digital Securities has conceptualized various workshops, products and resources to cater the needs of different section of students' communities and eventually reaching out to an **excess of 8,000 students** and tutors in different cities across the country.

Kyrion Digital Securities is also proving services to top software giants such as **Microsoft India** in some of their confidential projects.

Key Points of Kyrion Digital Securities:

- Ours is an **IIT Delhi** Alumni Venture
- Help government to conduct Education and Awareness Programs on Ethical Hacking & Information Security. (ISEA Project)
- We are providing services to Software Giant such as **Microsoft**.
- We have a rich experience of working on **cyber cases** and giving workshops to **Delhi & Uttar Pradesh Police**.
- The **Ministry of Home Affair** (Forensic Lab, Hyderabad) supports our Head Trainer.
- We have developed our own **software, spywares, bombers, remote administration tools (Trojans)** etc.
- We provide students the knowledge in the field of Ethical Hacking & Information Security by giving **live hacking** and **gateway demonstrations**. This would enable them to **secure themselves** from such kind of attacks.
